

PROJECT	The Urban Grape Boston, MA
DETAILS	SonaSpray "fc" White 1/2" Thick 2,500 Sq. Ft.
ARCHITECT	Oudens Ello Architecture Boston, MA

The distinguished owners of the Urban Grape dreamed of creating a neighborhood wine store centered around community, memories and joy through the experience of wine. Attention to acoustic performance was imperative on this project in order to create an ambience aligned with this concept.

The concrete coffered ceiling created a challenge due to the echo and deafening reverberation it produced. This challenge was effectively resolved by the innovative architects at Oudens Ello who made the brilliant decision to have 0.5" of SonaSpray "fc" white applied over the ceiling. This clean, crisp application provides state of the art acoustical control while maintaining the ceiling's

original, rustic construction look. The application at 0.5" produces an outstanding Noise Reduction Coefficient of 65%.

SonaSpray outperforms all other acoustic remediation products on the market today. Noise reductions of 65% to 90% are common results achieved from using this product. SonaSpray is Class I fire rated, meeting all local and state code requirements. This product provides an attractive, high performance solution to acoustical and lighting design objectives in both new construction and renovation projects. Typical applications include: worship centers, hospitals, schools, ballrooms, retail outlets, theatres, libraries, concert venues, terminals and many more. SonaSpray "fc" is available in white, arctic white and black, and is also available in custom colors making it ideal for your next project.

Contact International Cellulose Corporation today at (800) 444-1252 or visit us online at www.spray-on.com for complete details on how ICC can improve your building projects. ICC also offers architects an AIA/CES HSW SD Lunch N Learn program both live and on-line on the subject of Solving Architectural Noise Problems.
